published by our National Government*

BUREAU OF STANDARDS JOURNAL OF RESEARCH

PUBLISHED AT WASHINGTON, D. C.

With the July (1929) issue, the JOURNAL began its second year and third volume. The JOURNAL contains the bureau's research papers and critical reviews in the fields of science and technology. These will be comparable in interest and importance with the bureau papers already issued.

Several hundred researches are always in progress at the Bureau of Standards, and the outlet for the results is the "BUREAU OF STANDARDS JOURNAL OF RESEARCH."

If interested in following the latest developments in science and technology, you need the BUREAU OF STANDARDS JOURNAL OF RESEARCH. If you are a subscriber, renew your subscription promptly. Copies are limited, and it is not always possible to supply back numbers.

PRICES

New subscription (or renewal) to Journal of Research
for United States, Canada, Cuba, Mexico, Newfound-
land, and the Republic of Panama \$2.75*

Blue buckram bound, Volume 1, July to December, 1928 \$2.75*

*For other countries, add 75 cents.

Address orders only to

FEDERAL SPECIFICATIONS

PROMULGATED BY THE

FEDERAL SPECIFICATIONS BOARD

(Complete to November 1, 1929)

UNITED STATES
GOVERNMENT PRINTING OFFICE
WASHINGTON : 1929

FEDERAL SPECIFICATIONS BOARD

In 1921 the Federal Specifications Board was established for the purpose of coordination and economy in the procurement of material and services used by the Government under specifications prepared in the various branches thereof, to avoid duplication of effort, and for the better utilization of resources and industries. To this board was assigned the duty of compiling and adopting standard specifications for materials and services and of bringing the specifications into harmony with the best commercial practice wherever conditions permit, bearing in mind the desirability of broadening the field of supply.

SPECIFICATIONS PROMULGATED BY THE FEDERAL SPECIFICATIONS BOARD

The following specifications have been officially adopted and promulgated by the Federal Specifications Board as Federal Specifications for the mandatory use of all departments and independent establishments of the Government. Use of specifications indicated by (*) are mandatory on the War Department, Navy Department, and Marine Corps only, and optional with other departments and establishments of the Government.

HOW TO OBTAIN SPECIFICATIONS

PRINTED SPECIFICATIONS MAY BE PURCHASED ONLY FROM THE SUPERINTENDENT OF DOCUMENTS; OTHERS CAN BE OBTAINED, UPON REQUEST, FROM THE FEDERAL SPECIFICATIONS BOARD

Specifications *bearing only one number—i. e., Federal Specifications Board number*—are in mimeograph form and can be obtained, upon request, from the Federal Specifications Board, Washington, D. C.

Printed specifications bear *Bureau of Standards circular numbers or other bureau publication numbers in addition to the Federal Specifications Board number, or marked (†), and must be purchased direct from the Superintendent of Documents* at the prices indicated. The latest revision is shown by small letters, a, b, c, etc. The complete Federal Specifications Board number should be

given, thus, 243a ("a" indicates a first revision, "b" a second revision, and so on). Copies of this index may be obtained by purchase from the Superintendent of Documents, Government Printing Office, Washington, D. C.

Do not send purchase orders to Bureau of Standards or Federal Specifications Board. Address request, accompanied by cash or money order, to the Superintendent of Documents, Government Printing Office, Washington, D. C.

The price of each printed specification is 5 cents per copy, unless otherwise noted.

NOTE.—Specifications of departments and establishments of the Government other than those issued by the Federal Specifications Board, are not obtainable from this board. Requests for specifications other than Federal Specifications Board specifications should be addressed to the respective departments of the Government; for example, Army: Quartermaster General, War Department, Washington, D. C.; Navy: Bureau of Supplies and Accounts, Navy Department, Washington, D. C.

A DIRECTORY OF LABORATORIES

COMMERCIAL TESTING AND COLLEGE RESEARCH

In recognition of the desirability under present conditions of independent commercial testing service and in anticipation of a marked increase in the demand for such service in both domestic and export trade, there has been compiled by the National Bureau of Standards a list of laboratories throughout the country that are prepared to test various kinds of commodities to determine whether or not they comply with purchase specifications. This list is being issued as Bureau of Standards Miscellaneous Publication No. 90.

291 COMMERCIAL TESTING LABORATORIES

In accordance with the law the National Bureau of Standards makes tests and carries out investigations for other Government departments. Because of the large amount of this official work, it is impracticable for the bureau to make tests for private individuals if other laboratories can do the work. To inform interested persons of the location of other laboratories, the bureau has compiled a list of the 291 commercial testing laboratories throughout the country, together with indications of the types of commodities which they are prepared to test. Special care has been exercised to make this list complete.

199 COLLEGE RESEARCH LABORATORIES

To accompany the list of commercial testing laboratories there has been compiled a list of 199 colleges which are used not only for the purposes of instruction but also to a considerable extent for research work. In fact, many important industrial research problems are being solved in the college laboratories.

The existence of a thoroughly classified list of testing laboratories will have a number of

beneficial effects in promoting the use of specifications, not the least important of which will be the inducement offered to the large number of purchasers who have hitherto hesitated to buy on specifications because of their inability to determine whether or not commodities delivered correspond to the specification requirements.

For the purpose of minimizing the disadvantages incident to the use of specifications, the bureau has inaugurated a so-called "certification plan" in accordance with which there are compiled lists of manufacturers who have expressed

their desire to supply material complying with certain selected nationally recognized specifications and willing to certify to the purchaser, upon request, that the material thus supplied is guaranteed to meet the requirements and tests of the specifications. This plan has already been applied to 248 Federal specifications. Copies of any of the 248 lists of manufacturers to which additions are being made from time to time, can be obtained upon request.

DIRECTIONS FOR OBTAINING THE DIRECTORY OF LABORATORIES

Copies of the Directory of Commercial Testing and College Research Laboratories may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C., by sending WITH the order a remittance either in the form of post office money order, coupons (issued for the specific purpose of purchasing Government publications), express money order, New York draft, or cash—at the sender's own risk. It is important to follow these directions explicitly to avoid delay and confusion. An order blank is given below for your convenience. Add one-third if to be shipped to a foreign country (other than Mexico and Canada).

A DIRECTORY OF SPECIFICATIONS

Considerable economy can be realized in the purchase of commodities by the use of specifications. Real competitive bidding can be invited, and the delivery of satisfactory material can be insisted upon. To an ever-increasing extent State and city governments, public utilities, and the better organized industries of the country are adopting the use of specifications, which has been a feature of Federal Government purchasing for many years.

Information regarding the best known specifications for more than 6,000 commodities is given in convenient form in the National Directory of Commodity Specifications, which has been issued by the Bureau of Standards with the cooperation of the Bureau of Foreign and Domestic Commerce of the Department of Commerce. The book tells not only what specifications are in general use, but also by whom they were prepared and where copies can be obtained. In it are conveniently indexed for ready finding about 27,000 specifications prepared by the Federal Specifications Board and the separate departments of the Federal Government by State and city purchasing agents, public utilities, technical societies, and trade associations. At the request of Mr. Hoover, then Secretary of Commerce, an advisory board was selected by these interests to represent them in supervising the preparation of the Directory.

The contents include: A statement and indorsement by the advisory board, a foreword by Secretary Hoover, a thoroughly classified list of specifications for all types of commodities. There are also included an alphabetical list of commodities, which serves as an index to the specifications, and directions for obtaining copies of specifications listed in the Directory.

Summary of commodities and specifications therefor

Decimal class	Commodity groups	Commodities indexed	Approximate number of specifications
000	Animal and animal products.....	350	1,600
100	Vegetable food products, oil, seeds, expressed oil, and beverages.....	525	2,100
200	Other vegetable products (except fibers and wood).....	400	800
300	Textiles.....	275	1,900
400	Wood and paper.....	625	3,300
500	Nonmetallic minerals.....	725	3,300
600	Ores, metals, and manufactures (except machinery and vehicles).....	1,700	6,400
700	Machinery and vehicles.....	800	2,900
800	Chemicals and allied products.....	600	2,400
900	Miscellaneous.....	650	2,400
	Total.....	6,650	27,100

Whether you are a producer or a consumer, a seller or a buyer of commodities; whether you are interested in the preparation or in the use of specifications, the Directory contains for you information which you can not afford to do without. It is printed in small, but legible type, and thus the number of pages has been kept at the minimum, 385, without sacrificing the usefulness of the Directory. It is bound in cloth. The cost of printing and binding the book at the Government Printing Office is \$1.25.

DIRECTIONS FOR OBTAINING THE DIRECTORY OF SPECIFICATIONS

Copies of the National Directory of Commodity Specifications may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C., by sending with the order a remittance either in the form of post-office money order, coupons (issued for the specific purpose of purchasing Government publications), express money order, New York draft, or cash—at the sender's own risk.
